

PURE FOODS SYSTEMS

The ComboVend Range

PRODUCT CATALOGUE

Three Machines, Built
for Modern Vending.

ABOUT

30+ Years of Vending Innovation and Service

At Pure Foods Systems, we make it easy for you to rent or buy high-quality vending machines — sustainably and affordably.

With us, vending is more than machines — it's a promise.

A promise to deliver better service, better solutions, and a better future for vending across the UK, Europe, and beyond.

With offices in Croydon, Redhill, and Kent, we're perfectly positioned to supply, stock, maintain, and support vending solutions nationwide — with rapid response times, global reach, and a team of true vending experts ready to help.

Where Smart Technology Meets Real Support

With the UK's largest stock of spare parts, cutting-edge technology, and a flexible approach to every project, we keep your machines, and your business — running smoothly. Innovation and sustainability drive everything we do, from smart vending solutions to reducing environmental impact. At Pure Foods Systems, our mission is simple: to refresh, replenish, and revolutionise vending — one machine at a time.

Three Models. One Standard of Excellence.

From compact offices to transport hubs and retail environments, the ComboVend Range delivers next-generation vending — combining sleek design, intelligent technology, and powerful capacity options.

Each model is engineered to perform: built with durable steel construction, energy-efficient cooling, and remote cloud management. Whether you need a small footprint or a large-scale solution, there's a ComboVend designed to fit your space, your branding, and your business goals.

Why Choose ComboVend?

- 💡 Adaptive Design: Choose the size that suits your environment.
- ⚙️ Advanced Engineering: Dual spirals, precision sensors, and modular cooling for uptime.
- 🌐 Smart Connectivity: Cloud-based remote monitoring keeps you in control anywhere.
- ♻️ Built to Last: Insulated, powder-coated steel construction with efficient refrigeration.
